Trilliant Profile

DISCOVER THE *Power Of Choice*

Trilliant - 30+ years of providing mission-critical solutions to Energy Companies, Utilities and Cities that drive financial outcomes

Proven, device-independent communications platform

- **Multi-tiered network** drives optimal outcomes: WAN, NAN, LPWAN, or Cellular
- End-point and device-independent, enabling customers to experience the **Power of Choice**

Advanced Smart Grid & Smart City Solutions

- Trilliant for Smart Grid solutions: **AMI 2.0**, Data & Analytics Services, Distribution Automation, Demand Response
- Trilliant for Smart Cities solutions: Smart Lighting, Suite Metering, IIoT Gateway and more

200+ customers drive smart initiatives

- **Electric, gas and water** clients worldwide across smart grid, smart cities and IIoT deployments
- **Blue chip customers** across APAC, EMEA, Canada and the Americas

Strategic Partner eco-system

- Highly experienced, **trusted partners** include suppliers, SI's, technology providers
- Seamless, standards-based integrations

Committed to Sustainability

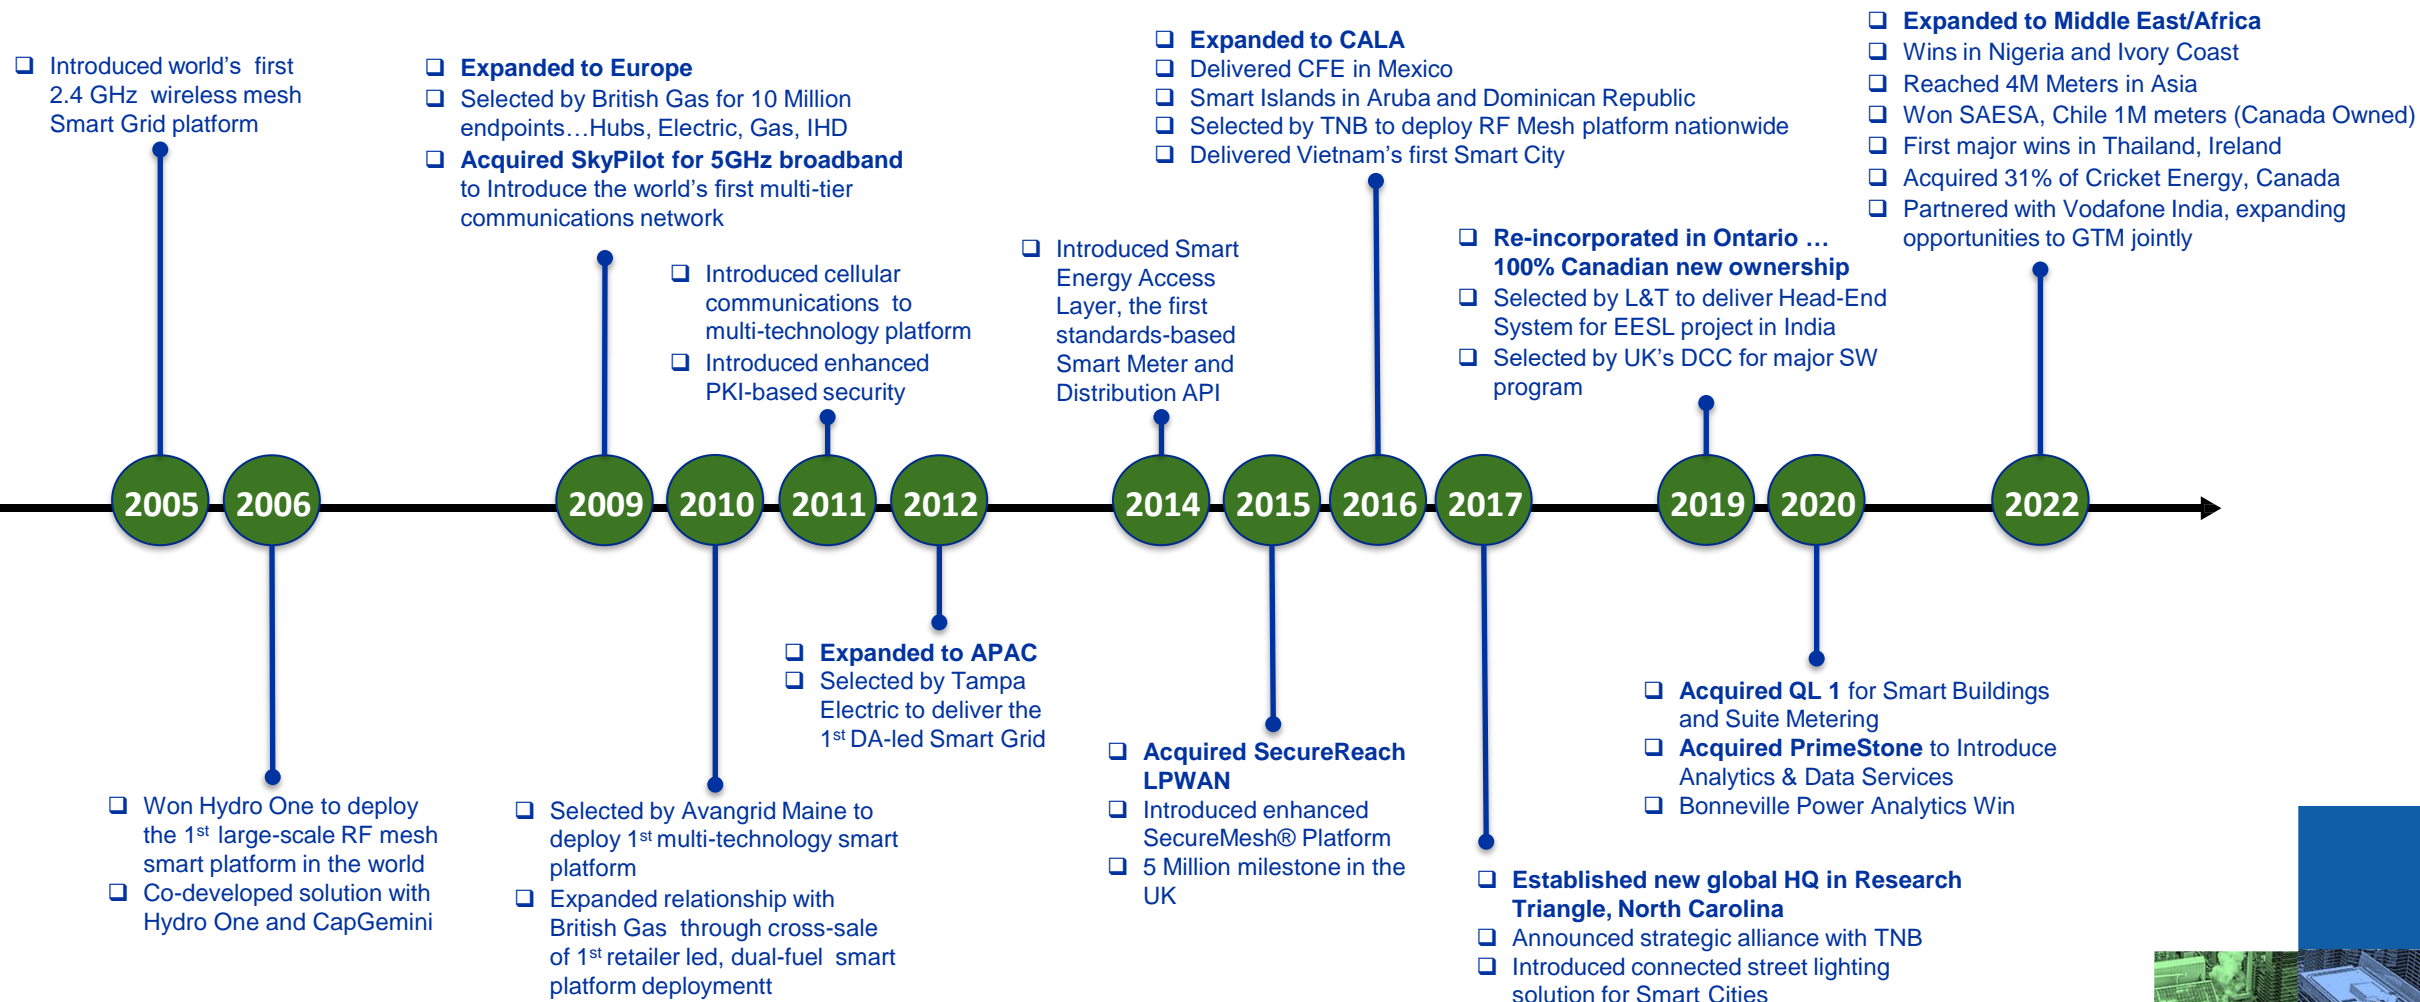

- Dedicated to **delivering sustainable solutions** to support the acceleration of the Energy Transition for our customers
- UN Global Compact Participating Member
- 2022 EcoVadis Silver Certification
- 2022 DEKRA Recertification for Environmental, Quality Compliance
- Certified Level One EcoResponsible
- ISO Certified 9001, 14001, 27001, 45001

AMI with RF Mesh & Cellular – Hybrid Architecture

Smart Metering – Deployment and Challenges

DISCOVER THE *Power Of Choice*

Smart Metering Deployment Status

All India Smart Metering Status As on 20th October 2023

Challenges of AMI Rollout

- Capacity
 - In span of 4-5 years for deployment
- Communication Network reliability and resiliency
 - Selection of right technology
 - High bandwidth to meet all the use cases defined by the utilities
 - Public Network meeting the SLA requirement
- Scalable Cloud Infrastructure
 - Application platform must be scalable
 - Provide Hyper Scalar environment to offer Application as a Service
- Data Management
 - Effective use of captured Metering data for useful analytics and application beyond billing
- Standardization
 - Standardization of Communication Module for field swappable
 - Standardization of Application Integration

Trilliant Reference Projects

DISCOVER THE *Power Of Choice*

EESL Project - India

India (Uttar Pradesh & Haryana)

- Largest AMI project in India
- Deploying 5M total. 1.7M deployed to date, performing at ~99% (Cellular)
- 6 meters brands integrated using IS15959 standards
- Proven results: average monthly revenue from consumers in high loss areas have increased by more than 35% through NTL reduction

Trilliant, Larsen & Toubro support largest AMI deployment in India

By Claire Volkwyn - Sep 4, 2019

Trilliant and Larsen & Toubro have reached a milestone of the largest AMI deployment in India scaling to more than 5 million meters across Haryana and Uttar Pradesh

Communications solutions company Trilliant, a global provider of secure, enterprise-wide smart energy communications solutions, and Larsen & Toubro (L&T), have signed an agreement to support the Energy Efficiency Services Limited (EESL) smart meter rollout across Haryana and Uttar Pradesh.

L&T will back integration of the Trilliant Head End System (HES) to reach the deployment target of 5 million smart meters.

TNB Project - Malaysia (APAC)

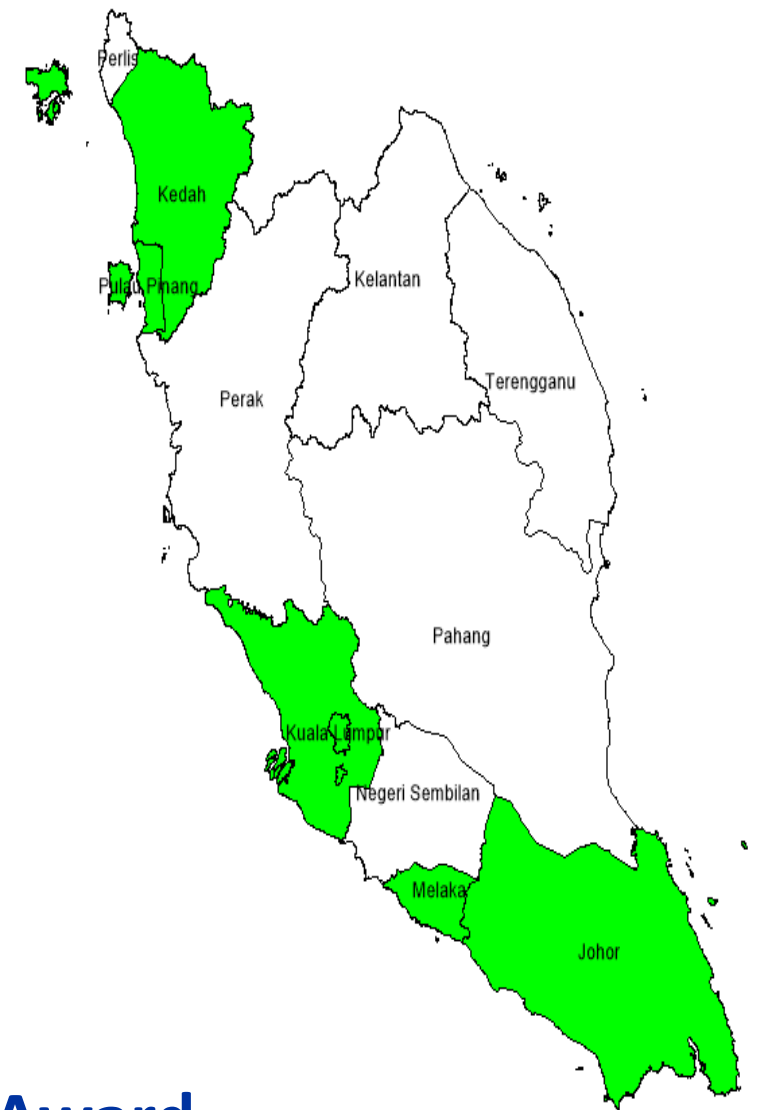

- Trilliant exclusive RF for AMI, DA, Streetlighting...19-meter brands
- Largest RF Network of 3.2 Million end points with 99.8% availability

Meter Deployment Plan

- Melaka rollout (2018) – 238K
- 2021 cumulative target – 1,800,000 (Completed)
- 2022 cumulative target – 2,600,000 (Completed)
- 2023 cumulative target – 4,000,000 (In progress)
- 2027 cumulative target - 9,000,000 (TNB and Govt Announced)

Confidential

TNB Wins 2022 AMI Project of the Year Award

Summary

DISCOVER THE *Power Of Choice*

Key take away for AMI Deployment

- **Build technical competency in the industry**
- **Communication Network – High bandwidth with capacity**
- **Application platforms – Scalable and support multiple technologies**
- **Supplier agnostic**
- **Standardization of meter and application integration**
- **Cloud environment – Hyper scalar offering applications as a service**
- **Reliable end to end network to meet the defined SLA**
