

## VERY IMPORTANT:

1. **A. Parallax:** We want it like your own website as mentioned initially. **COMPROMISED BY US.**  
We should be able to add or delete or modify any of the services. As mentioned we need to connect with you eve time on a fully dynamic website.  
**B.** Please make **Major /minor Services** in menu bar editable. (Make it Global Client Services and Other Services respectively for now)
2. **Latest News Section:**
  - a. The slider dots should be outside the box as was shown to us earlier. No website have I seen where the dots are part of the text. **COMPROMISED BY US.**
  - b. In the Latest news Section, as mentioned earlier, please make the headlines bold and please increase the font size of headlines.
  - c. Add the content of latest news section (content already shared with you)
  - d. As mentioned earlier, please reduce the height only of latest news box. It should end in proportion with the white line from left. (the box size has to reduce)

3. **As mentioned earlier, please remove the blue banner**, where the text 'We believe in ...' Is written. The background of latest news box only can be made with some different shade to be able to read text. (maybe same color as of 1,2,3 of What we Do) or any other color that looks good so that the images that are used on home page are visible clearly. **DO NOT OVERLAP THE HOME PAGE IMAGE.**
4. **Images to be used on both top and bottom of each service in the Services Section.**
  - a) We requested earlier, you need to add a banner/picture below content section of same proportion as used on top with different images on each page. (Images already shared as per your request) Current Images used are not appropriate in the services section, in accordance with the content. They need to be high resolution impactful and connected with what is being said.
  - b) Now as mentioned by you we will contact you to update the pictures below content every time it needs updating, sheer carelessness at structure. **COMPROMISED BY US.**
5. **In Gallery section:**
  - a. 10-12 images along with description should move automatically in the slider in a loop. There should be a text box below the slider in the Gallery Section wherein we can write a short description about the picture. Text box is just stuck next to slider.
  - b. Thumbnails **COMPROMISED BY US.**
  - c. As mentioned earlier, gallery folders need to have the design element /design oriented (samples already shared)
6. **Team Page:**
  - a. As mentioned earlier, Team Boxes should be design oriented with some creativity (samples already sent).
  - b. For hierarchy to be depicted as on your website, Please provide us with 5 fixed rows with editable names and editable photo option as per the rest. Quite hard to accept illogical. **COMPROMISED BY US.**
  - c. Tabs should be stylish. For example, like in a diary we have chipped pages of months in different colors. **COMPROMISED BY US.**
  - d. Explained earlier as well, Placement of Team Photos and Text about them should cover the screen width wise (starting from first photo and ending on the last photo on right.)
