DISTRIBUTION UTILITY MEET

Multiple Conversations, With A Common Denominator

ON THE DISCOM DESK

India Energy Stack
Live Use Cases

Draft Policies

- Data Sharing
- Time of Day tariffs
- Demand response
- Demand Flexibility

Cyber Security & Data Protection Rules (mid-2027)

Peak Demand 2026
270 GW

DUM 2026 AGENDA

New loads:
AI Data Centers, EVs

Duck curve, flexibility, BESS

Climate Resilience

India Energy Stack & Cybersecurity

All of it needs data a utility can join up and trust.

DISTRIBUTION UTILITY MEET

The Barrier Is The Data Foundation

"For Indian DISCOMs, the barrier to advanced analytics is rarely the algorithms themselves, but rather the foundational architecture"

DISTRIBUTION UTILITY MEET

A Single, Trusted Data Layer

© 2026 WorkOnGrid (Pragyaam Data Technologies Pvt Ltd) - Confidential

Grid.

DISTRIBUTION UTILITY MEET

A Single Data Foundation, Many Use Cases

Commercial Losses

- Energy Balances
- Unbilled consumption

Reliability

- Transformer Health Monitoring
- Load Balancing

DER & Peak Demand

- Dynamic Voltage Regulation
- Demand Response

...And More

- ISFG handbook 2025: 174 AI use cases

THE FOUNDATION

A Unified Utility Data Layer

DISTRIBUTION UTILITY MEET

5 Principles For The Agentic Discom

1 **Start from the money:** pick the costliest loss, name who acts.

2 **Build the data layer once:** new use cases and vendors read from it.

3 **Prove it on your data, early:** real data shows what demos hide.

4 **Keep it sovereign:** data, platforms and models in India.

5 **Keep people in the decision:** agents analyse, engineers decide.

DISTRIBUTION UTILITY MEET

Let's build the Agentic Discom, together.

Start With Trusted Data

01

Build Your Data Foundation

One trusted, sovereign data layer first. Then agents on top to manage the volume.

02

See It Live: Booth 23

See our Autonomous Agents running on live data.
